

WEATHERMAKER® 38TKB

AIR CONDITIONER

10.0 SEER EFFICIENCY

CARRIER'S 38TKB CENTRAL AIR CONDITIONER DELIVERS COMFORT AND VALUE.

COOL COMFORT

As a member of Carrier's exclusive WeatherMaker family, the 38TKB delivers cool comfort and energy efficiency with the added benefit of superior reliability. Designed and manufactured to deliver comfort and exceptional value, the 38TKB is an excellent choice for discerning homeowners. That's why so many people turn to the 38TKB for cool relief from the summer heat.

ENERGY EFFICIENCY

As summer heats up and the outdoor temperature's on the rise, the 38TKB can keep you comfortable without stretching your budget. Offering up to 11.5 SEER (Seasonal Energy Efficiency Ratio), the 38TKB central air conditioner offers considerable improvement over older, less efficient models. By replacing an older air conditioner which may have a rating of 8 SEER or lower with the 38TKB, you can decrease your electricity consumption by as much as 30 percent on indoor cooling. Combine the money-saving efficiency of the 38TKB with the reliable operation and long-lasting performance of Carrier products and you'll enjoy indoor comfort summer after summer.

RELIABLE VALUE

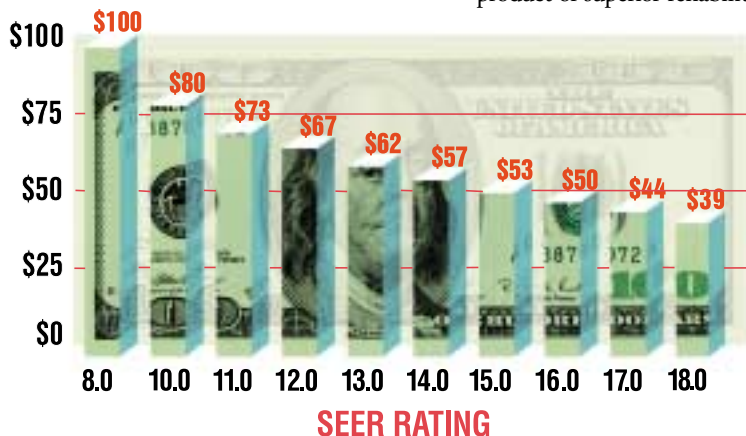

Designed and manufactured by the leader in indoor comfort technology, you can rely on the 38TKB central air conditioner for years of cooling comfort. At Carrier, we understand the value of consistent, reliable indoor comfort equipment. That's why we build the 38TKB with the most durable, corrosion-resistant materials available. We designed the compressor with built-in protection from damaging high currents, temperatures or pressure. The copper tube/aluminum fin coil delivers excellent heat transfer and corrosion resistance. The solid brass service valves have leak-resistant connections for added durability. All of these features are designed, assembled and tested to ensure a product of superior reliability and performance.

IdealHumidity
SYSTEM

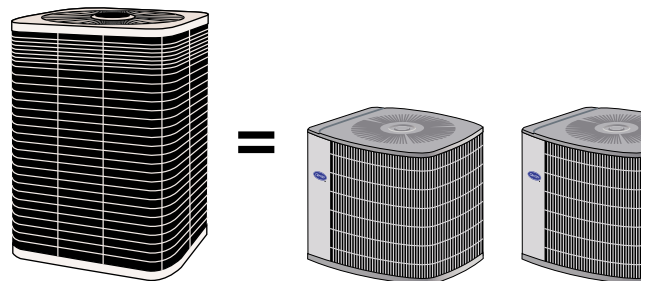

The 38TKB can be a part of an IdealHumidity

System with the addition of a variable-speed furnace or fan coil, a humidifier and our exclusive Thermidistat™ Control. IdealHumidity from Carrier is the ONLY system that controls humidity levels even when the indoor temperature does not require heating or cooling operation. Ask your Carrier dealer for details.

For every \$100 you would spend to cool your home using an 8 SEER system, a 10 SEER Carrier 38TKB system should cost about \$80. Actual savings will depend on the efficiency of your current system compared to the efficiency of a new system.

COMPARATIVE SOUND LEVELS AT 1.5-TON SIZE*

*Comparison of 38TKB and a standard model with a sound rating of 80dBa. Sound levels vary by size.

It takes 1.6 Carrier 38TKB models operating at the same time to equal the sound produced by one typical air conditioner.

PROVEN PERFORMANCE FOR COMFORT THAT LASTS.

PRODUCT TESTING

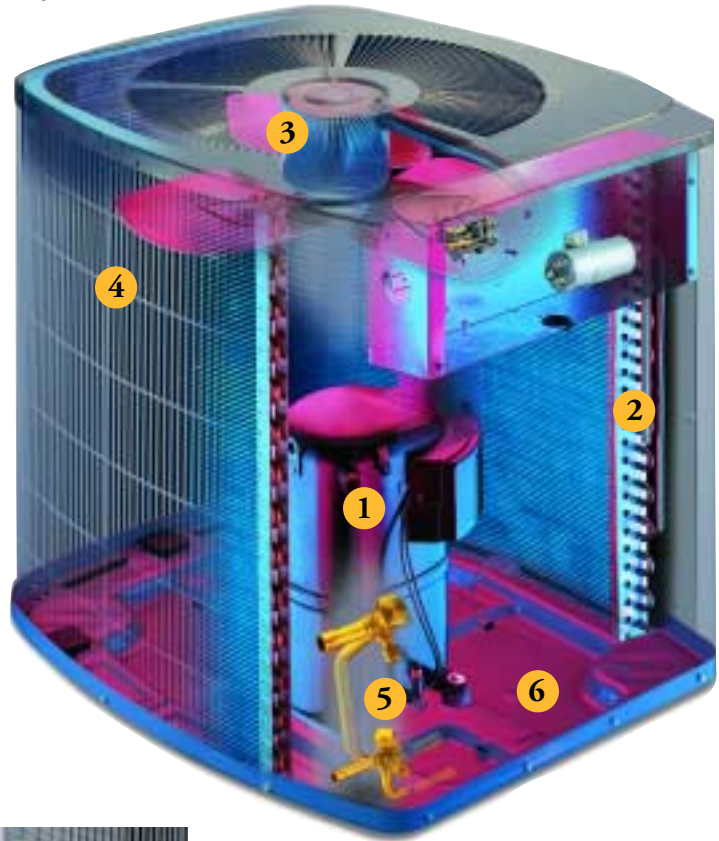

Designed to withstand the tests of time and extreme temperatures, the 38TKB offers long-lasting indoor comfort that meets your specific needs. Carrier performs the most rigorous testing in the indoor comfort industry. Our testing process begins during product development and continues through assembly line and in-field testing. In fact, we test the 38TKB at 125°. That's a full 10° higher than the industry standard requirements. This kind of extensive testing helps ensure that homeowners like you get the comfort and reliability you expect from the leaders in indoor comfort technology.

LASTING PROTECTION

Carrier's exclusive WeatherArmor™ III protection system further ensures the long-lasting durability of your comfort investment. Designed specifically to keep your air conditioner safe from corrosion and damage, the WeatherArmor III system offers three points of protection. First, the 38TKB is surrounded by a protective cabinet made of heavy, galvanized steel. Then, we assemble the cabinet with ceramic-coated screws for corrosion-resistance and long-lasting durability. Finally, we protect the outdoor coil with a heavy-duty wire guard that prevents coil damage caused by objects such as hail, rocks, sticks and other debris, as well as lawn equipment. Designed for top-quality performance, the 38TKB is built with durable components and protected by the exclusive WeatherArmor III system to ensure that you enjoy cool comfort summer after summer.

TECHNOLOGY

- 1 Quiet, money-saving cooling** is provided through our energy-efficient compressor. With built-in protection from potentially damaging high currents, temperatures or pressure, this compressor is guaranteed by a 10-year limited warranty.
- 2 Improved cooling and efficiency** of the copper tube/aluminum fin coil is the result of excellent heat transfer. Corrosion-resistant construction ensures durability for years of indoor comfort designed for you.
- 3 Efficiency and comfort** is improved by using our low-speed motor and large-diameter fan blades.
- 4 Attractive, durable cabinet** includes the WeatherArmor III system for extra coil protection, long-lasting performance and outstanding reliability. Heavy-duty steel cabinet, ceramic-coated screws and our enhanced coil guard combine to help the 38TKB take the abuse of the great outdoors.
- 5 Corrosion-resistant connection** to your system is provided with our solid brass service valves.
- 6 Better drainage of water and debris** minimizes chances for corrosion, thanks to our new base pan design.

Carrier's exclusive WeatherArmor III protection system keeps the outdoor coil safe from hail, high winds, sporting equipment and potentially damaging lawn equipment.

WARRANTY

Carrier takes pride in offering the best indoor comfort equipment available. In fact, we offer a **10-year limited warranty** on the compressor. The entire 38TKB central air conditioner is covered by a **five-year parts limited warranty**. Ask your Carrier dealer about extended warranties.

This product is designed and manufactured under the ISO 9001 registered quality system.

CARRIER SYSTEMS OFFER UNMATCHED PERFORMANCE.

CARRIER SYSTEMS

Humidifier

As part of a total indoor comfort system, a Carrier humidifier replenishes moisture to dry, indoor air.

Evaporator Coil

A Carrier evaporator coil is matched with the proper outdoor unit to provide top cooling efficiency and years of reliable service. If replacing your outdoor unit, Carrier recommends the replacement of the indoor section as well, to ensure peak performance and reliability.

Furnace

Carrier offers a complete line of top-quality, high-efficiency gas and oil furnaces. Ask your Carrier dealer which one is right for you.

Air Cleaner

Carrier air cleaners can substantially improve your indoor air quality by removing harmful and irritating airborne pollutants from your home.

Air Conditioner

Carrier's complete line of air conditioners provides reliable, high-efficiency cooling for long-lasting comfort and energy savings. Ask your Carrier dealer about Carrier's environmentally sound air conditioners with Puron® refrigerant.

Zoning

Comfort zoning allows you to set different temperatures for different areas of your home. Enjoy greater comfort and added energy savings with room-to-room temperature control.

Comfort Ventilator

Carrier's comfort ventilator adds a breath of fresh air to today's tightly constructed home. It combines fresh outdoor air with conditioned indoor air for improved air and energy exchanges.

Thermidistat™ Control

A Carrier Thermidistat™ Control is your command center. Precise temperature control and programmable features keep you in touch with your comfort.

MATCHING COMPONENTS PROVIDE OPTIMUM COMFORT, EFFICIENCY AND PERFORMANCE

- Forced-air systems are usually built around an indoor unit, such as a furnace or a fan coil.
- The outdoor unit will be an air conditioner or heat pump combined with a furnace for year-round comfort.
- Air quality is greatly improved with the addition of an air cleaner, humidifier and a ventilator.
- Precise temperature control comes from a Carrier thermostat matched to your system.
- Zoning provides the ultimate in control over your custom made indoor comfort system.

EXPERTISE

Carrier has been on the leading edge of the indoor comfort industry since Willis Carrier invented what we now know as air conditioning in 1902. Since that time, Carrier scientists, engineers and dealers have been providing homeowners

with the most advanced indoor air technology available. This technological advantage has enabled Carrier to customize indoor systems for millions of homeowners nationwide.

Today, you can rely on your local Carrier dealer to evaluate your indoor comfort needs and

suggest a customized system that fits those precise requirements. By recommending the appropriate furnace, air conditioner, humidifier, air cleaner, ventilator, zoning system and controls, your Carrier dealer can deliver enhanced comfort while improving the efficiency of your system. Ask your Carrier dealer for a system evaluation today.
