

GAS FURNACE – 58MCA

EFFICIENT PERFORMANCE AT UP TO 92.1% AFUE

WARM UP WITH OUR 92.1% EFFICIENT CONDENSING GAS FURNACE.

PERFORMANCE

Experience customized comfort with Carrier's 58MCA condensing gas furnace. Combining top-quality performance, money-saving fuel efficiency and long-lasting durability, the 58MCA delivers the indoor comfort you'd expect from the industry's leader. When winter arrives, the 58MCA allows you to enjoy the comfort of your home with the perfect blend of Carrier technology, responsive heating and resource-saving operation year after year.

EFFICIENCY

Offering up to 92.1% AFUE (Annual Fuel Utilization Efficiency), the 58MCA gives you control over your budget and your environment.

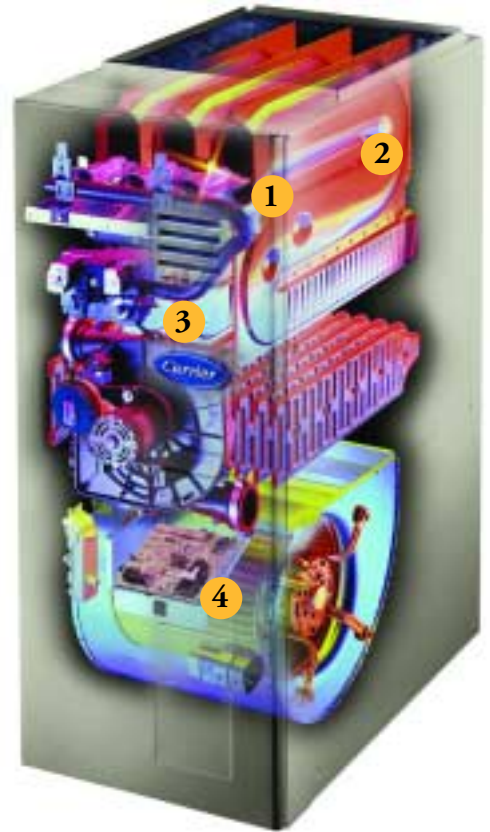

Carrier's S-shaped heat exchanger converts about 80% of the heat from the furnace into usable heat for your home. The flow-through condensing heat exchanger extracts another 10-12% of the usable heat so you can enjoy added comfort and energy savings. The electronic control board monitors furnace operation to further ensure accurate, safe and reliable heating.

QUALITY

Carrier's advanced designs, careful construction and attention to detail add up to unmatched reliability. The 58MCA's technologically advanced components are attractively packaged in a durable, corrosion-resistant cabinet. To further ensure your comfort, Carrier assures product quality through extensive testing. That's why so many homeowners count on Carrier for all of their indoor comfort needs. For comfort, energy efficiency and superior value, choose customized indoor comfort from Carrier.

TECHNOLOGY

- 1 Reliable, energy-efficient ignition of the burners** is a result of the hot surface ignitor system. This system delivers efficiency and reliability well beyond the levels achieved using a pilot light system.
- 2 Energy-efficient performance** of the 58MCA comes from our heat exchangers. The Super-S heat exchanger transfers 80% of the usable heat from the furnace into your living space. The unique flow-through condensing heat exchanger squeezes approximately another 10-12% of the usable heat for exceptional comfort and efficiency.
- 3 Added comfort and energy savings** is provided by the inducer motor which precisely draws outdoor air into a sealed combustion system for extra-quiet, draft-free comfort.
- 4 Accurate, reliable heating** is ensured by the electronic control board which oversees furnace operation. It also simplifies the hookup of additional comfort equipment such as an electronic air cleaner and humidifier.

WARRANTY

Carrier's confidence in our products is backed by written component and product warranties. The flow-through condensing heat exchanger is protected by a **20-year limited warranty**. The entire unit is covered by a **five-year limited warranty**. Carrier also offers extended warranties. Ask your Carrier dealer for details.

Horizontal installation

Carrier's concentric vent option combines the two-pipe vent system into one single wall or roof penetration for a cleaner, more finished look.

As an ENERGY STAR® Partner, Carrier Corporation has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.
